

# CARE PLAN INFORMED CONSENT

Zylk Health **Governing Regulations:** Telemedicine Practice Guidelines (2020), National Medical Commission (NMC), & FSSAI (for dietary supplements)

*This is a legally binding medical consent document. By checking the "I Accept" box or clicking the verification button during your digital intake assessment, you ("Patient", "User") acknowledge that you have read, understood, and agreed to the following clinical terms regarding your medical care, the prescribed pharmaceutical products, bundled wellness items, and the limitations of digital healthcare.*

You are seeking a medical consultation via Zylk Health, a technology platform that connects you with an independent Registered Medical Practitioner (RMP). You acknowledge and understand that: This consultation is being conducted digitally and asynchronously (via medical questionnaires and photographs). Telemedicine has inherent limitations. The RMP cannot conduct a hands-on physical scalp examination, check your vital signs, or perform in-person diagnostic tests. Zylk Health and its consulting RMPs do not handle medical emergencies. This service is strictly for elective management.

You understand that completing the health assessment and making a payment does not guarantee that you will receive prescription medication. The independent RMP retains absolute clinical autonomy to approve, modify, or reject your requested Care Plan based on their professional medical judgment. If the RMP determines that the medical treatment is unsuitable or unsafe for you based on your digital assessment, no prescription will be generated, and your payment will be refunded in full.

You acknowledge that the Care Plans recommended via Zylk Health are comprehensive kits that may bundle active pharmaceutical ingredients, dietary supplements, cosmetic topicals, and physical application tools. You understand and accept the specific risks associated with each category: Your kit may contain pharmaceutical ingredients. You acknowledge the risk of known side effects, including: Scalp irritation, redness, itching, flaking, temporary increase in hair shedding upon initial use, dizziness, and unwanted facial/body hair growth. Decreased libido, erectile or ejaculatory dysfunction, mood changes, breast tenderness or enlargement. Your kit may include physical stimulation tools. You acknowledge that a 0.5mm derma-roller creates micro-punctures in the skin. You assume all risks of improper use, which include scalp injury, bleeding, and severe bacterial infection. You explicitly agree to strictly follow all hygiene instructions, including sanitizing the derma-roller with medical alcohol before and after every single use, and never sharing the tool with another person. Your kit may contain ingestible dietary supplements regulated under the FSSAI. These are wellness products, not medications. You assume all risks of gastrointestinal discomfort, interactions with other medications, or allergic reactions to food-based ingredients (such as dairy, soy, nuts, or gluten). Your kit may

contain topical cosmetic items. You acknowledge the risk of contact dermatitis, scalp irritation, or allergic reactions to natural or synthetic cosmetic ingredients.

The RMP is relying *entirely* on the accuracy, honesty, and completeness of the medical history, dietary allergies, photographs, and lifestyle data you submitted through the digital intake assessment. You confirm that: All information you have provided is 100% accurate and complete. You have not withheld any information regarding pre-existing medical conditions, current medications, or known food/drug allergies. You will strictly follow the dosage, hygiene, and application instructions provided by the RMP on your e-prescription and product packaging.

You agree that if you experience a severe allergic reaction (such as difficulty breathing, swelling of the face/throat, severe hives), chest pain, rapid heartbeat, scalp infection, or any medical emergency following the use of the prescribed products or bundled tools, you will: Immediately discontinue the use of all Zylk Health products, tools, and supplements. Immediately seek in-person emergency medical care at a local hospital or physical clinic.

By proceeding with this, you provide explicit, informed consent and assume all risks associated with the use of the prescribed medical products, dietary supplements, and physical tools. If you experience any adverse health outcome, allergy, infection, or injury due to providing false, incomplete, or misleading information on your assessment, failing to properly sanitize your physical tools, or as a result of the known inherent risks of the prescribed items, you agree to hold Zylk Health, its venture studio, and the consulting RMP entirely harmless. The RMP and Zylk Health shall not be held liable for any known or unforeseen side effects, infections, allergic reactions, or adverse outcomes arising from your use of the bundled Care Plan kit.

**By submitting my phone number or completing the digital health assessment, or paying for a Zylk Health Care Plan, I hereby electronically sign and agree to this Care Plan & Medical Informed Consent document.**
